**When Presentation Meets Performance**

## Introducing Ethafoam® Synergy® Fine Cell Polyethylene Foam

Sealed Air is constantly striving to provide our customers with a range of products that can fill specific needs. Ethafoam® Synergy® PE foam is a low-abrasion solution for applications where both presentation and performance matter.

### A Hard-Working Foam Goes Soft

Ethafoam® Synergy® PE foam provides all of the legendary performance capabilities of our standard Ethafoam® PE foam, but in a fine-cell format, which improves aesthetics while providing a soft-to-the-touch feel.

### Limitless Recycling

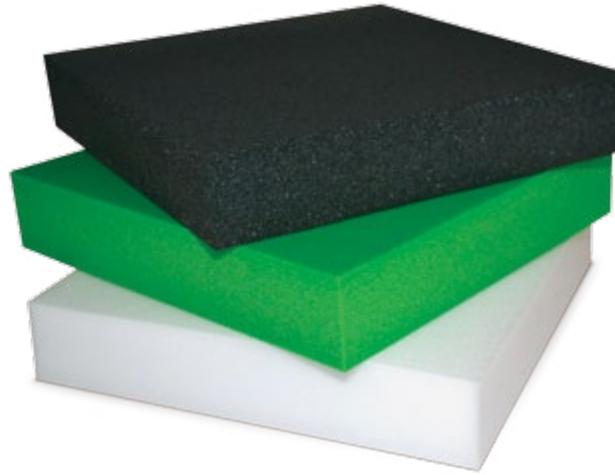

As constituted, Ethafoam® Synergy® PE foam can be re-used without a drop in performance. Because it is non-crosslinked, and manufactured from polyethylene resin, the material can be ground up and recycled in Sealed Air's Closed-Loop Recycling system. This allows for meaningful waste reduction.

### Easier Fabrication

Ethafoam® Synergy® PE foam is an easy material to fabricate, regardless of the method (routing, water jet cutting, die cutting). The product offering includes both a low and high density option.

### Making a Strong Case

The perfect application for Ethafoam® Synergy® PE foam is one where aesthetics, performance and low-abrasion are all essential considerations. As such Ethafoam® Synergy® PE foam is commonly used in custom case inserts, automotive returnable and expendable dunnage, and tool control applications.

### Ethafoam® Synergy® Polyethylene Fine Cell Foam

Ethafoam® Synergy® PE foam is available in black and natural as a standard product offering. Additional colors are available upon request, minimums and lead times apply.

Product	Color	Size
Ethafoam® Synergy® 1000	Natural	1.8# 2" x 24" x 108"
1000	Black	1.8# 2" x 24" x 108"
Ethafoam® Synergy® HP	Natural	4# 2" x 24" x 108"
HP	Black	4# 2" x 24" x 108"

#### Sealed Air Polyethylene (PE) Foam Sustainability

We are committed to increase sustainability by enhancing the performance of our PE foam products with decreased use of natural resources in manufacturing by increasing recycled content. Our PE foams are classified as #4 low-density PE (LDPE) material and can be recycled in LDPE recycling systems, including our Closed Loop Recycling program.
